

# Earth School for Souls

25 February 2018

Asks a reader:

*I have heard from a reliable source that there is a school and classes for spirits who are about to incarnate, that covers the theoretical aspects of what may be encountered on Earth.*

1. *What subjects are covered?*
2. *Do they discuss money system?*
3. *Who are teachers? Former humans?*

C: "Ask we, why has the reliability of this source not produced dependability of explanation? Consider that, as we hope to supply it.

We hope your double truth checking exercise proves fruitful; that a leap of faith you do take. The push we provide; jump well and far, we hope you do.

1. Your questions have asked, what preparations do souls make for journeys across Earth. To answer this is not short, and we say, too long for this forum and suited to a book it would be, yet its summary we will attempt, bear with us we hope you shall. Brevity we attempt, clarity of thought we hope it carries to you, the results we shall see. Shall we?

Why does a soul seek incarnation, on Earth or elsewhere? This is the first topic, easily answered by all souls in this class, as and since, you and they already know the answers. Presence in class is the result. These are shared, and as it has been some Earth time on this side of the curtain, you remember not the course and see not your notes. You took this class, make no mistake.

Experience unable to be gained in another way, is the reason. From this point forward, choice is the bulk of the long book which could be written. Course 101 is: Experience is & as, the reason(s).

The next subject covered is choice. Here the book grows thick and long, a virtual menu it becomes. You choose many things, from a deep, massive list of priorities and options. The some of you choose deeper or related experience(s) about something already done. Murder victim may choose murderer as a role. Although rare is this. So few of you become either.

Gender, height, coloring and the many physical traits all human may have, are also chosen.

This process involves great coordination among the many souls whose lives you will share. Your parents are chief among these.

Experiences also include the insertion of exit points, where the choice to return home becomes available, if you believe and expect the experiences you have selected are sufficient, as that intersection arrives. You will not know until the approach draws near, so these are options.

Finally you choose your completion, the vast majority of you reaching it as planned or scheduled. Great counseling from other souls with experience is given, so that a life of balanced joy and challenge is planned, to provide the greatest benefit to all souls with whom you shall interact.

The greatest satisfaction you derive from the experience of life is: service; to know you have served the purposes of others. By achieving this, you have served yourself and return home the most grown and complete you can.

2. Yes, economics and money are a part of the mix, because these reflect your desires. Human movements of money are a significant way interactions are structured. You give and

receive money as you prefer yours and others' reactions best suit the purpose. To feel appreciated, valued, cheated and tricked can all be reached well, with human money.

3. The teachers you select and among them, are many souls with incarnations under their belts, as humans like to say. Incarnations as many things on many planets are available, and you also draw from these things. You are attached to Earth purely by choice; it is attractive and draws a crowd, but it is not required. It is not exclusive.

Deep, detailed yet simple is the School of Earth, both in its planning and carry through, the execution of plan and your fulfillment of path, of destinations. The detail which matters you already know; for it is your life.

The school is both theory and practice. Using human words of English, we say, it can be well described as orientation, then birth into training and fulfillment.
