

Egyptian Pyramids

19 August 2018

A reader asks:

Interesting and convincing books about interesting ways ETs have affected humans include two well researched ones, which make the case that early pagan religions and The Old Testament were strongly influenced by ET caused events.

Included are ancient Egyptian stories in which supposed gods were actually helpful ETs who employed unknown technologies. The logic of the ideas made sense.

I was looking at a website with extensive information channeled from Archangel Michael. One message said the Egyptian pyramids were constructed using many laborers, hoists and lubricants. I have never bought into this. Several years ago scientists attempted to prove this construction method, but could not.

Q1. Would you say it is true that some of the stories told in pagan religions are actually based on events which directly involved the activities of ETs?

C: Yes, many of such stories. Extraterrestrials have been visiting Earth since long before humans were created, and in fact and deed, most life on Earth, plant and animal both, have been and were seeded by ET visitors. This occurred first millions of years ago, by Earth time calendarization, and extensive evolution of many species has occurred, and also extinctions and mutations. There have also been introductions of a few new species, the most significant in Earth history, what would become homo sapiens.

Since human creation occurred, there is a prime directive which prevents interference and distortion beyond effects from human choices and natural geophysical or astral forces.

Humans may however choose widely known interaction, and have. Few humans do so nowadays - either believe or choose - and general beliefs are that alien extraterrestrial visitation does not occur. There are more than a few people in many government organizations or tohers controlled by central authorities, who both know otherwise and will not disclose their experiences or knowledge.

Q2. I ask the same thing about the Bible's Old Testament.

C: Many events contain extraterrestrial involvement or partial causation.

Q3. I ask the same thing about many of the events involving supposed gods in the ancient Egyptian period.

C: Such gods were often extraterrestrials but Guardian Angel Guide intervention is also prominent in such events. The manna from heaven which saved the fleeing Hebrew slaves was coordinated by the Guardian Angels Guides of the many escapees and also alien extraterrestrial visitors.

Q4. What specifically can you tell us about how the Egyptian Pyramids were constructed, and were any ETs involved?

C: The pyramids were built by extraterrestrial visitors entirely, using anti-gravity or gravity neutralization devices. As we have explained before, magnetism and gravity are essentially the same force, gravity the effect from what occurs inside an atom, magnetism the effect outside the atom, in certain materials which are conductive and have other atomic structural properties. Aluminum is conductive as is copper, but these two cannot be magnetized. The material which manifests its gravity outwardly on Earth is iron, what humans have assigned element number twenty six.

Q5. Were any particular technologies used to construct the pyramids which we are not familiar with?

C: Yes, the anti-gravity device, which we have explained in detail here before. To briefly summarize, this device reverses polarity of the atomic component rotation, or to be chemically precise, takes advantage of the reversal of proton, neutron and electron rotation and revolution. The electrons rotate in the opposite direction in one mass, and this cancels the effect of gravity pull upon that mass, from surrounding masses of material.

The stones were reverse polarized at the atomic level and simply rose silently as the gravitational effects were - and can be - suspended, stopped or halted.

Q6. Lastly, if any of the above was the case, why were those ETs subsequently withdrawn?

C: Extraterrestrials have never withdrawn from Earth, humans have chosen to receive and initiate less and less contact. Visitors to your planet Earth who come from other planets and sometimes galaxies, have cloaked, covered and concealed their presence in precise proportion and coordination with the fade in human interest.

You might well say there is interest and we agree, however there is also mass hysteria waiting to be unleashed if the revelation of alien extraterrestrial presence is carried out in certain ways. Humans have chosen to teach, develop and reinforce the ideas now very common about alien extraterrestrials. This choice stops and slows the public disclosure, because humans have chosen leaders who conceal the contacts.

Choose new leaders, a process which will follow human idea changes that indicate many of you, a majority, will not "freak out" as is a common way to describe a reaction many among you would typically display.
