

# Notes And Quotes

January to June - 2018

**The life plan is designed but there is no training as humans understand that. The role of guidance to ensure events are faced as scheduled falls to Guardian Angel Guides, and follow through to the incarnated soul.**

Thomas Jefferson – 2018 09 January

**It would be greedy, arrogant and ungenerous of me to occupy a place on Earth where another soul would benefit much more.**

Thomas Jefferson – 2018 09 January

**The British will follow the rules, the French will not and Americans only follow rules and laws they believe fair and just.**

Thomas Jefferson – 2018 09 January

**There is an unhealthy willingness to lazily follow procedure, courts, laws just because these things are decided, written down and handed out as immutable.**

**I am not saying civil disobedience, I am saying think about the reasons a rule or law came to be and should it or they continue.**

Thomas Jefferson – 2018 09 January

*Why do humans emphasize events per year?*

**Because you live by calendars.**

*Before calendars, what did humans do?*

**Live without them.**

Year 2018 – 2018 12 January

*You don't wish to avoid bad things?*

**Nothing is labeled or packaged this way.**

*What then is pursued?*

**Knowledge, which is what you have done with incarnation.**

Year 2018 – 2018 12 January

**Too few of you will believe you have chosen the experience of the events (hurricanes, earthquakes), and a fair number of observers and participants would naturally adopt the view of God's punishment.**

Year 2018 – 2018 12 January

*What's been accomplished for readers or for myself?*

**For readers you have accomplished what cannot be described well beyond this; an opening of perspectives in directions nearly nobody on Earth now holds.**

What's Been Done Here? – 2018 19 January

**The purpose of human sleep is to unhook the mind. To make the soul escape the brain. The body.**

The Bee's Knee – 2018 20 January

*Why don't humans hibernate?*

**Non-hibernation in humans is because of the genetic stock from which humans were created. There is no hibernation function in animals which inhabit a climate where the long period of cold temperatures is absent. Human genetic stock was taken from animals which inhabit regions of Earth with more steady climates.**

The Bee's Knee – 2018 20 January

*The bear's soul doesn't perceive the elapse of time?*

**Neither the soul nor the bear, the former because it does not apply and the latter because it is not aware.**

The Bee's Knee – 2018 20 January

**Living in the moment means not taking it for granted, to worry only about what can, should or might happen. Or what already has and cannot be changed.**

The Bee's Knee – 2018 20 January

**Your human soul is not one hundred percent enclosed in your human life, although it does seem that way to your fellow souls in Heaven. Very little of what creates a soul remains actively engaged; the experiences are filed away. Temporarily archived. You are a vast store of memories and experiences and also active interaction with any soul with whom you have contact. Your life on Earth places the focus of contacts with only other incarnated souls on Earth.**

The Bee's Knee – 2018 20 January

**The soul which chooses to occupy a less mentally complex being retains its ability to contact and interact with other souls.**

The Bee's Knee – 2018 20 January

*So when I kill a roach or spider scurrying across the floor, the soul of that bug and all other souls who know the bug's soul are aware of what I've done?*

**Yes.**

The Bee's Knee – 2018 20 January

*There is no murder?*

**This concept speaks to intent and the human perception of finality. Because there is no finality for a human soul, the event is not labeled as positive or negative. A suicide killer who slaughters dozens of humans then is killed or kills himself, is welcomed home with the same love, hope and expectation as any other.**

The Bee's Knee – 2018 20 January

*So I will not go to hell if I kill another person or a snake?*

**No, unless you create a hell for yourself and place yourself into it. This is not rare, and resembles punishment on Earth, however it is voluntary. No soul is forced or obligated.**

The Bee's Knee – 2018 20 January

*This is great difference between Earth and Heaven, huh? Here on terra firma, we can force others to do things. In Heaven that's impossible.*

**You have succinctly identified the reason for incarnation; well summarized.**

The Bee's Knee – 2018 20 January

*Do most souls who incarnate as a human start off as something smaller?*

**Yes, although it is not a requirement.**

The Bee's Knee – 2018 20 January

*Do souls ever incarnate as complex animals, such as what we call alien extraterrestrials or humans or elephants and then incarnate as something simpler?*

**Yes, this is also not rare. You might learn to pilot a massive complex jet, yet still enjoy flying as a passenger in a small recreation type aircraft.**

*What happens when a dead from freezing bee returns to Heaven along with 499,999 other bee souls?*

**Essentially the same thing as when 500,000 human souls return from Earth lives after a nuclear detonation, with one great exception; there is no galaxy and universe wide disturbance from the freezing.**

The Bee's Knee – 2018 20 January

*So mass murder by humans is not so bad?*

**Define bad; it is far more complicated from the life plan aspect. The lessons, planned interactions and experiences humans choose and pursue, involve far more interaction, opportunity, choice, reward, pitfall and downside on Earth, than does the incarnation as a bee. These interruptions have far greater effects on the souls of humans than the souls incarnated as bees**

The Bee's Knee – 2018 20 January

*Is the animal experience the preferred choice for a soul?*

**Yes.**

*Then why have some of us chosen mankind and not become a dog, bird or reptile?*

**Not this time you are not an animal. Upon your return home, you will understand the answer to this question in a way we cannot explain here.**

The Bee's Knee – 2018 20 January

**TC: the idea there is group control of a single master soul is not quite accurate (birds, fish, etc.), although it appears this way. There is programmed coordination, also called instinct, utilized by souls of the creatures whose movements seem coordinated or controlled by a single entity.**

The Bee's Knee – 2018 20 January Comments Patrick

**To Bee or not to Bee? Thanks for finally answering that question for us.**

The Bee's Knee – 2018 20 January Comments Tim

**Assume time not as the basis for all movement, but as an overlay upon that which can happen at any pace chosen. What we say is, time is either accelerated or slowed, depending upon the direction from which it is viewed.**

Time – 2018 22 January

**Time has accelerated for this person, but slowed for others. This occurs because of the individual's higher rate of vibration.**

Time – 2018 22 January

**The ability to see the aura around a body is nothing more or less than the ability to visualize the light frequencies.**

Time – 2018 22 January

**The change in vibrational abilities is likewise enhanced through practice, which begins with belief this exists and can be done.**

Time – 2018 22 January

**TC: the original creation of humans allowed for the external changes and deterioration of body functions as they already existed in the animals from whom the DNA was borrowed. This was allowed and chosen, because it is convenient to the purpose of the life plan and incarnation.**

Time – 2018 22 January Comments Patrick

**TC: The process of death itself, to the body, is one of the most teaching to a human....., death is far easier than birth**

Time – 2018 22 January Comments Patrick

*How can time be stopped?*

Close your eyes.

*That only suspends it.*

**Because you open your eyes again. Leave them closed and time will disappear until you open them again.**

What are Time and Energy – 2018 26 January

**Travelers across your galaxy. They depart from their home planet, where light reaches it from two stars, a binary pair about which several planets rotate. If time upon this sphere or globe is to be measured by angles of light, specifically the change, which star's light is used, or both? How is the cycle defined if there is no darkness?**

What are Time and Energy – 2018 26 January

**Your soul is not attached to any star or planet and has no physical body to be affected**

What are Time and Energy – 2018 26 January

*How then can a soul time travel, or insert itself into a life incarnation several hundred years before or after a life in progress currently?*

**It does not, that perspective is backwards. The lives and incarnations are simultaneous; their perception of arrangement along a time sequence only exists inside and within one specific life and from the point-of-view of the human side.**

What are Time and Energy – 2018 26 January

**Can you open several paper files and place them around yourself in a circle? Yes, and if you wish, a rotating chair placed in the center of a circular desk or table with a hole in the middle, might allow you to view each file from left to right, or right to left as you choose to rotate. You might also read each file from back to front, or the reverse if you prefer. You might also read each entry in any order your prefer, not chronologically.**

**This is how your soul arranges lives.**

What are Time and Energy – 2018 26 January

**Energy is the force which creates then motivates the components of atoms, at the subatomic level. A deep level, many stages or steps below, or more properly, inside the physical atom structure.**

What are Time and Energy – 2018 26 January

**Energy is existence.**

What are Time and Energy – 2018 26 January

**Reiki: What takes place is the transmission of you the therapist's energy to the subject. This is a two step procedure. Step one is your intent and step two is the receipt. Implicit in both is belief the process or technique is effective.**

Reiki – 2018 27 January

**Reiki restores the balance by unblocking the obstacle, releasing the jam-up or removing the constriction.**

**"This process operates at the subatomic level first, then rises to affect the atomic and higher levels humans now know. Electricity is one manifestation of the process and Reiki could be called a separate, related and very similar.**

Reiki – 2018 27 January

**In Reiki, the electricity is generated much the way humans and animals generate the electricity which operates the nervous system, however with one significant difference; intent.**

Reiki – 2018 27 January

**Your thoughts are not your brain, they are your mind which is your soul.**

Reiki – 2018 27 January

**Reiki is directed electricity, sent in the precise amounts and levels, amperage and voltage, to match the resistance and allow balance to be restored.**

Reiki – 2018 27 January

**The energy flows throughout the body and collects at the low points.**

Reiki – 2018 27 January

**The Reiki energy will flow to them (imbalances of energy in the body) and smooth over the highs and lows and make the energy flow as evenly as can be, much the way a horizontal sheet of glass would be.**

Reiki – 2018 27 January

**TC: Reiki and channeling employ the same energy in different forms, for different purposes and effects.**

Reiki – 2018 27 January Comments Patrick

**TC: Prayer is Reiki or Reiki is prayer and greater numbers at either or both ends of the process increase effects, also.**

Reiki – 2018 27 January Comments Patrick

**Mankind is becoming digitized, a circumstance we find amusing because it represents an unaware return to the essence of the human soul, which is digital. Mankind is analogue, by design and intent.**

Autonomous Vehicles – 2018 28 January

***A driverless car cannot control another one.  
Not yet.***

Autonomous Vehicles – 2018 28 January

**MU: The reiki energy is the energy around and available to everyone. That's not high, that's in your face, as many might say.**

Reiki Interview – 2018 02 February

**MU: To a sickly person approaching her or his life plan ending, and that means they will die, reiki will not amend the life plan and extend it, unless the recipient wants this.**

Reiki Interview – 2018 02 February

*Can reiki energy and effects really be sent across the ocean?*

**MU: Of course. The energy is; reiki is the technique, method or mode of transport**

Reiki Interview – 2018 02 February

**MU: Reiki is communication, which humans take to mean information. Yes, and the energy can also have physical effect, because that is what human communication also involves.**

Reiki Interview – 2018 02 February

*How does it calm the target, subject or patient mentally? Not the physical effects, such as disease, injury, discomfort or anything like that, but the temperament, mood, emotion and feelings?*

**MU: It seeks first and always the brainwaves, which are the effect of thoughts. These oscillate as can be seen on a screen or oscilloscope, as they are named. The reiki energy will attach to, add to, change the weight of and thus alter the total wave oscillation.....The forward velocity, or rate of issuance, of the subject's energy and emotions are made slower. These changes calm the subject compared to how s/he felt before the addition of reiki to the recipe.**

Reiki Interview – 2018 02 February

*What about physical improvements? Infections, inflammation, tumors, fractures and things like that?*

**MU: There are improved by causing the default setting, if you will, of the subject's structure to become re-set to original values. There is a pattern, grid, blueprint and framework for the body. Its structure, size, shape, functions and so forth.**

Reiki Interview – 2018 02 February

**MU: Energy sent by reiki is aimed very precisely, just as a sharpshooter would do with a specific target.**

Reiki Interview – 2018 02 February

**MU: Humans attempt to influence beliefs, but the only change which can be achieved is the influence over behavior, not the belief itself. Nothing can make a human grasp a pencil and write if s/he does not want to, voluntarily. Threats will do it until they are withdrawn; belief remains.**

Reiki Interview – 2018 02 February

*Can reiki be expanded to assist many subjects, by just one person?*

**MU: Yes, and it can be sent to assist many things. Trees, animals and even disturbance on and inside Earth will benefit from it.**

Reiki Interview – 2018 02 February

*Is there a precise procedure, method and technique to follow?*

**MU: No, however for humans mostly yes because you are all trained, as was I, to lift your belief and confidence in something by means of practice, teaching, training and experience. To learn the playing of a musical instrument or use of a complicated machine creates no physical effects in the body, yet the steps involved develop the talent. If a human truly believed s/he could play a piano, it would be possible from the first attempts.**

Reiki Interview – 2018 02 February

**Are the techniques and symbols explained in Reiki important for transferring energy?**

**TC: Yes, for aim, focus and accurate delivery.**

Reiki Interview – 2018 02 February Comments Santanu/Patrick

**If energy is transferred to another person without his/her knowledge, would it work?**

**TC: Yes, however likely to a lesser degree. It is better for the target to be aware and more helpful if the target knows something about the technique.**

Reiki Interview – 2018 02 February Comments Santanu/Patrick

**TC: Reiki is purpose, person and location specific.**

**Prayer always helps and is always heard, if not answered the way a sender hopes and prefers in all cases.**

Reiki Interview – 2018 02 February Comments Santanu/Patrick

**Almost all other animal and planet life has evolved from seeding carried out by the Arcturans, Canopians, Pleiadians or Sirians, and others.**

Reader Review – 2018 04 February

**The "transitional" species were the first humanoids, such as Neanderthal and Cro-Magnon. ....Humans are not an evolved species from other Earth creatures.**

Reader Review – 2018 04 February

**The purpose alien extraterrestrial have is provide information to the benefit of the receiving civilization, which the recipients have complete autonomy to use or reject.**

Reader Review – 2018 04 February

**When alien extraterrestrials understand there will be a good chance information is used for general benefit by mankind for itself, the information will begin to flow.**

Reader Review – 2018 04 February

**Recall from TC: life came from non living matter in a number of "primigenial" Planets , in each galaxy, then spread it up. The emergence of "life" from matter was the result of the coalescence of the "energy field" that all encompasses, we could call it The Force, the Eternal Love, or what have you.**

Reader Review – 2018 04 February Comments Pierluigi

**We have it on good authority that our soul is the electricity, our brain a computer. You ARE the only device needed. You have to feel your way through your body.**

Reader Review – 2018 04 February Comments Fluffaroo

**The events involving magnetic field intensity fluctuation have already begun and will continue.....Abrupt movement of magnetic pole locations against the hard and liquid planet surface are what will happen.**

Poles No Poland – 2018 04 February

**TC: The movement of magnetic pole positioning is always occurring, what will change will be the speed. The poles will move at more than one hundred kilometers per hour at some moments, and the fluctuations in Earth's magnetosphere will render satellite communication nearly impossible.**

Poles No Poland – 2018 04 February Comments Patrick

**Life is not only about love, however it is the foundation of all interaction.**

The Animal Kingdom – 2018 11 February

**Love leads you to decide not to modify too much or too highly the general conditions of human life, because of interactions with other humans.**

The Animal Kingdom – 2018 11 February

**To "Love" someone, something, some portion of nature, is to deeply "Know and Appreciate" them, it, whatever he/she or it is that you Love.**

The Animal Kingdom – 2018 11 February Comments Tim

**Revenge supplies nothing except an extension of the troubles. The major step forward humanity will take, is to acknowledge revenge as very detrimental to s/he who seeks it.**

Blood Moon Eclipse – 2018 18 February

**The opinions of others about you, are not your business. Be yourself, and allow others to react as they choose.....**

Blood Moon Eclipse – 2018 18 February

**Consider the effect a possession has, compared to its purpose.....**

Blood Moon Eclipse – 2018 18 February

**Do you choose to be kind or less so to others around you? You control yourself, of course. You cannot control reactions, but your intent yes.....**

Blood Moon Eclipse – 2018 18 February

**The troubled around you are even more receptive to goodwill than the less troubled. They do not always project it, it is not always obvious.**

Blood Moon Eclipse – 2018 18 February

**Help another person in some way. It is common to say something is being paid forward.....**

Blood Moon Eclipse – 2018 18 February

**A reversed pyramid: The higher the authority, the greater the responsibility. The higher authority is at the bottom, at the point. The masters are across the flat top, all on equal footing. Humans see authority telling those "below" the leader what to do. In Heaven, the leader is told, requested, instructed.**

The Organization of Heaven – 2018 20 February

**On Earth, a true decision committee can be tied up by a single or small group of protestors who introduce then clog the process.....Telepathic ability and speed make this far more difficult. Motives and true objectives cannot be enclosed and concealed inside a wash of words which say**

**otherwise or differently.**

The Organization of Heaven – 2018 20 February

**Each soul or being does what it chooses and goes where it wants. As long as each participant is doing what it prefers, that is perfect organization.....In Heaven differences are preferred and always accepted.**

The Organization of Heaven – 2018 20 February

*There is no such thing as prison in Heaven?*

**Heavens no, as you would say .....**

The Organization of Heaven – 2018 20 February

**The refreshed feeling of just waking up, after a long and deep night's sleep, is how you will feel at all times in Heaven. This is the natural sensation you always have.**

The Organization of Heaven – 2018 20 February

**In the Heaven where you need no physical body, there is no hiding, concealment, flight, pursuit, sanction or judgment but for that you choose to take on yourself.**

The Organization of Heaven – 2018 20 February

*What about a person's fear of starvation, shelter, loss of freedom, loved ones and possessions?*

**These exist as choices. If you believe you are in a position where these losses are such that you cannot reverse them, we assure you, you have chosen this perception and experience.**

The Organization of Heaven – 2018 20 February

*If we handed rifles and ammunition to 15-17 year olds, what would happen?*

**If they know what can happen with use of these tools, nothing that does not already happen and soon, almost no bad things. Humans will self regulate and self control in the absence of outside force, sanction rule and restriction.**

The Organization of Heaven – 2018 20 February

**You took this class, make no mistake.....**

**Experience unable to be gained in another way, is the reason.....**

**The next subject covered is choice.....**

**This process involves great coordination among the many souls whose lives you will share.....**

**Experiences also include the insertion of exit points.....**

**Finally you choose your completion.....**

**The greatest satisfaction you derive from the experience of life is: service.....**

Earth School for Souls – 2018 25 February

**The school is both theory and practice. Using human words of English, we say, it can be well described as orientation, then birth into training and fulfillment.**

Earth School for Souls – 2018 25 February

**You are asking what is God, and we say; you are. You the one, and you the many. You, one and all, are all parts of the same thing, as are we.**

Perplexion – A Complexion of Perplexity – 2018 26 February

**The beginning of what? This implies ending; a finish, then a start anew.**

Perplexion – A Complexion of Perplexity – 2018 26 February

**If we are perfect; are we? Who defines perfection, and who examines the evidence and scores final results? This process is inherently corrupt and dishonest, because we are, all of us, who set, meet or fall short of standard, therefore we are final arbiters of our perfection.**

Perplexion – A Complexion of Perplexity – 2018 26 February

**Companionship is not a desire, it is a reflection. The felt desire for companionship is nothing deeper than a desire to return to one another, because connections has been too far, too short, too brief.**

Perplexion – A Complexion of Perplexity – 2018 26 February

**Humans use poetry is, this appeals by its resemblance to telepathy, you know.**

Perplexion – A Complexion of Perplexity – 2018 26 February

**The mind is the controller of matter, the body but the machine built to respond to commands. The body machine of the Yeti is configured for capability humans have not.**

Big Feet – 2018 27 February

**They can meditate their invisibility.**

**They are the natural species to Earth, evolved over eons of time before humans were created.**

**They are benevolent, gentle, extremely intelligent and docile until threatened.**

Big Feet – 2018 27 February

**We were created by mixing DNA from alien ETs and some already existing Earth animals ..... The earlier humanoids, what we now call Cro-Magnon and Neanderthal, then died off and were no more.....BigFoot / Yeti / Sasquatch are NOT descended from the first humanoids.**

Big Feet – 2018 27 February Comments Patrick

**AFTER the initial mining period was complete, about 3 decades after enough gold was removed, THEN upgrades & adjustments to the DNA and thus human form, were introduced. The purpose was to enhance human homo sapiens' ability to survive and thrive in the Earth environment .....The first ones were the only "version" used in mining. Their remains have been classified as Cro-Magnon and Neanderthal**

Big Feet – 2018 27 February Comments Patrick

**TC: The energy is the same that 'powers' you. It is not from where it has come, but where it goes. Straight to the human heart.**

**The collective energy of the universe has built and reached a peak, and releases. It washes over and through everything which has fed the very build-up now set free.**

Transgenderism – 2018 27 February Comments Patrick

**The condition of meditation is simply connection.**

Meditation – 2018 07 March

**Your human battery will last far longer than the benefit of meditation requires to begin. Unlike an electrical device, you disconnect to reinforce the one connection you never break.**

Meditation – 2018 07 March

*Meditation is similar to sleep while awake?*

**Yes, without so much of the physical part of sleep.**

Meditation – 2018 07 March

***How can success be detected (in meditation)?***

**It is a self scoring process, where nothing is measured or counted. You will know you have achieved what you wished, as you feel, sense and perceive it.**

Meditation – 2018 07 March

**Allowing yourself to hear yourself.....Meditation allows this to be done with yourself, but without noise, chatter, activity or movement.**

Meditation – 2018 07 March

**Meditation is the acceptance and allowance of what you are, by you. That requires no effort, push or prodding. It is what you always are. The part of you which is always alive and cannot die. The essence of your soul which has no beginning or ending, thus no course, route, path, goal, strategy or objective.**

**These are fine things to have as part of life on Earth, however they are the wrappings of human life over, on top of and covering your soul, spirit and existence. It is beneficial to temporarily disrobe your mind from human things, and allow your essence, your true being and permanent self, to just be.**

Meditation – 2018 07 March

**A human life lived without the reflection and consideration of the soul inside the human body and being, is as worthwhile as another soul & person who actively seeks the re-connection. Very different outcomes will result, both equally valuable. There is no human experience not worth having.**

Meditation – 2018 07 March

**Meditation will clear your mental decks. Clarity and understanding will follow, because the meditation will sweep away the mental chatter which otherwise confuses or blocks this clarity.**

Meditation – 2018 07 March

**There can be no sound body without an equally sound mind.....Mental clutter, confusion and stress beget the exact same thing in the body. Meditation allows organization to come anew, and from that will come physical organization in the body.**

Meditation – 2018 07 March

**Steve (on a meeting of Rocket Boy and Trump)**

**I think it's worth them meeting, you never know, someone might come away with a half decent haircut !!□**

**Patrick @ Steve: Good haircut? Don't bet on it. One's hairdo looks like a mop, the other one a toilet brush.**

Meditation – 2018 07 March Comments Steve & Patrick

**Perfect organization is when choices are voluntary; it is that simple. Any decision which has an involuntary part represents disorganization.**

The Structure Of Earth – 2018 10 March

**The opportunity incarnation offers is the experience of choice and effect. This is why human**

**perfection does not exist. In Heaven, everything is perfect.**

The Structure Of Earth – 2018 10 March

*What happens when we die, physically and to our human perception of it?.....*

**If violent and sudden, you do not believe you are in Heaven. You will see your lifeless body, in many cases. You will take note of the surroundings, however everything will seem different and more peaceful. To what degree depends on each of you, but we can assure you all, it will seem as peaceful as anything you have felt as a human. Your memories of who you are, will return steadily.**

Returning To Heaven – 2018 19 March

*What about a long, drawn out and violent death?*

**All details will be remembered, however the pain, anguish or suffering which might be part of the ending of life will not hurt in any way. To the contrary, you will examine this very closely and with great curiosity, appreciation and enjoyment.**

Returning To Heaven – 2018 19 March

*What about horribly inflicted death, such as torture?*

**You will feel no more pain, fear, suffering or anguish. To the contrary, you will quickly and nearly immediately become aware that the one and many people who inflicted the torture you suffered, will be experiencing the effects, exactly as you felt them. You will feel great sorrow for them**

Returning To Heaven – 2018 19 March

*What about a violent, but abrupt death?.....*

**The fear of death, screams of desperation and all other things are not only suddenly relieved but understood and appreciated. You can say, it is crazy, delusional and outright nuts to suggest the screaming victim of violence about to die, appreciates it. That is correct, from the human perception and this is another example of the great value incarnation offers.**

Returning To Heaven – 2018 19 March

*What happens to most of us?*

**Your soul departs the body before physical death can happen. A great fall is one example.**

*Sickness, illness or disease?*

**The soul also leaves the body before this happens and often, before death. This is called a coma**

Returning To Heaven – 2018 19 March

**The horror of death humans see is not perceived. Sadness and sorrow felt by humans who lament the unexpected departure is the great cause of pain to a newly returned soul.**

Returning To Heaven – 2018 19 March

**Religion on Earth is a human creation, system and set of beliefs. Many faiths have some overlap with Heaven however much of religious belief is rooted in unawareness. This does not make it right or wrong, for unawareness is magnificent opportunity for learning.**

Returning To Heaven – 2018 19 March

**The idea of wanting to know what will be seen, derives mostly from the human fear of blindness and the dependence upon sight prevailing on Earth.**

Returning To Heaven – 2018 19 March

**TC: There are no newer ventures, the previous ones are never old. Simply additional. The word "new" is human.....The attachment to the former Earthly body disappears as soon as death liberates a soul.**

**This concept of miss is also human. It means the experience cannot be repeated**

Returning To Heaven – 2018 19 March Comments Patrick

**There is no such thing as karma or karmic return. This is not punishment to the former torturer, it is willingly undertaken by that soul.**

Returning To Heaven – 2018 19 March Comments Patrick

**The space-to-space meeting always occurs, to enable two souls to say they're met and know one another.**

*Space-to-space?*

**There are no faces. You go to the place and space another occupies, or they come to you. This is easily accomplished, for travel is achieved with thought.**

Soul Groups – 2018 20 March

*Is the human need for a physical meeting based on the physical proximity of two Heavenly souls? Entirely, and reinforced by the physical limits of Earth.*

Soul Groups – 2018 20 March

*What is a soul mate?*

**Simply a member of the soul group, and a person or animal or beast or pet with whom you schedule a relationship.**

Soul Groups – 2018 20 March

**Does the term "Individual" that we humans use to allude to the fact that we are all separate, actually mean that we are connected to this one thing that is "In-divisible" or "In-divide-able" or "In-divide-&-duel", ... separate, yet interconnected in every way.**

**The Committee practically shouts "YES"**

Soul Groups – 2018 20 March Comments Tim

**Most USA gun deaths are suicide, about 60%.....**

**.....Why are humans violent? We shall simply say, because it is taught.**

USA Gun Laws – 2018 29 March

*How did you come to know Earth or about it? Or us?*

**AE: Information about Earth and many, many places is broadcast throughout the galaxy. We suggest an internet type format.**

A Visit With Another Alien – 2018 30 March

*What might prevent a newcomer civilization from approaching Earth?*

**AE: Absence of commitment to avoid interference or distortions of Earth and human development.**

A Visit With Another Alien – 2018 30 March

*Do you resemble humans closely or at all?*

**AE: No, beyond our general structure, being eight legs, two upper limbs and a head. Humans**

**would not like our appearance**

A Visit With Another Alien – 2018 30 March

*What should we know? Not what we might like to know, but what should we know?*

**AE: We are not to be feared, we are not going to solve human problems, we cannot. We can suspend the effects however but the problem will remain once the control we would provide is taken back.**

A Visit With Another Alien – 2018 30 March

*If you can move at 100 light years in 5 of our minutes, you can traverse 1,200 light years in an hour. Crossing our 100,000 light year wide galaxy would require 83 hours, give or take.*

**AE: Somewhat less, however that is not far off.**

A Visit With Another Alien – 2018 30 March

*Why isn't offensive or defensive force employed?*

**AE: There is no need and it is understood as useless. If you stand at the top of a precipice and wonder what might be found far below, would you jump off and allow gravity to take you there? It will and immediate death will erase the purpose of the jump, and your life. You can descend by several other means and achieve the same thing, remaining alive and well.**

A Visit With Another Alien – 2018 30 March

*What advice do you have for us?*

**AE: Look upon your fellow human as a part of yourself, because all of you are. Like the one you hate, as much as you like whom you love.**

**It is our honor and pleasure to communicate with the earliest of the alien extraterrestrial communicators, in this phase of humanity. There has been much contact but not of this telepathic nature.**

A Visit With Another Alien – 2018 30 March

**The Committee says at the edge of "the" universe is another one. Where one ends, another begins and they are all connected along the edges. Wormholes, as we have named the phenomena, and black holes, another variety, are doorways or conduits between them. Between one and several, in some cases.**

A Visit With Another Alien – 2018 30 March Comments Patrick

*Black holes?*

**There are two phenomena, unrelated to one another, both called this. One is a dense object, often and usually a former collapsed star. The other is a doorway, conduit, hatch, opening, passageway, portal or tunnel into another universe.**

Black Holes – 2018 06 April

*Dense object.....*

**Atoms are nearly empty, and can be compressed into a size far smaller than the volume of the object represents in the less dense state. The mass will remain the same.**

**Dense object : The larger a molecule, a connected group of atoms, the less dense it can become and retain the properties of the material in the Earth three dimensional environment. The smaller a molecule or atom, the more it can be compressed, because its nucleus contains fewer neutrons or protons. The distance between the orbiting electrons and the nucleus can be smaller.**

Black Holes – 2018 06 April

**In the Earth environment of its three dimensions, there are limits or constraints to the existence of material in the environment. This applies to everything, and your bodies have physical presence because of this. When these limits are changed, material will take on different properties.**

Black Holes – 2018 06 April

*The darkness isn't?*

**For an interface yes, because light from one universe enters the other. Light from the next one can enter this one, but the object producing electromagnetic energy must be close enough to the interface for that energy to pass through. This is unlikely, thus it seems dark or black.**

Black Holes – 2018 06 April

*Have stars collided with a former star dense object?*

**Yes, and these are what create nebulae.**

Black Holes – 2018 06 April

*Do our souls go between universes often or at all?*

**Very uncommon, because there is nothing unique between them. All universes offer and contain what does any other.**

Black Holes – 2018 06 April

**The technological ability to detect the electromagnetic and gravitational waves will be shown to humans at some point, by your ET cousins and neighbors. Later the ability will be developed to use this detection capability, as interstellar travel is achieved.**

Black Holes – 2018 06 April

*For what purpose(s) do such universes (9) exist?*

**Growth, compartmentalized thus unique.**

*Do the higher planes of existence (astral, causal, etc.) in these universes connect to, or unite with, the planes in this universe?*

**Yes, as does yours however you are not aware of the connection.....The connections are not as strong inter-universally as they are intra-universally.**

Black Holes – 2018 06 April Comments Cooper & Patrick

**TC: The nine digits used on Earth, are a symbol and representation of the nine universes, three groups of three, the points of the triangles which represent all matter.**

**Dimensional levels and physical constraints & properties are the same in all nine.**

**All nine mutate, evolve and develop simultaneously.**

Black Holes – 2018 06 April Comments Pierluigi & Patrick

*What do humans need to understand?*

**Yourselves.**

*Understanding what, exactly?*

**Who you are, why you are here and where you will go when you are finished.**

Big Holes – 2018 08 April

**Wealth is perception, trust and confidence..... Scarcity is no more than the delay between thought and manifestation. Where no delay is felt, no scarcity exists and the notions of wealth evaporate.**

**Absence of wealth defines money, and trade in goods and services simply sets the table for an efficient medium of exchange, itself given an idea of power which it does not have, a power which does not exist.**

Big Holes – 2018 08 April

**The often discussed shift in human consciousness, as it occurs now, involves the presence, advice and companionship of your cousins from nearby in the galaxy.**

Big Holes – 2018 08 April

*How do they (extraterrestrials civilizations) overcome the violence, unrest, unease and strife?*

**By choosing otherwise, to always be kind and generous, as much as they can.**

*Don't we incarnate with trial and tribulations built into our life plan, and these give rise to the human troubles we have?*

**Yes and no. You are never obliged to carry out anything in a life plan you dislike and you can - and do - review and adjust them, nearly every night you sleep. There are many frustrations, lessons, confrontations and dilemmas which can teach you all much about your soul and your happiness, without the negative things humans so commonly and automatically assume are inevitable.**

Big Holes – 2018 08 April

*What's the first and best thing we can do to begin improvements?*

**Trust your fellow human being, and never see her or him as inherently evil or bad.....All children will happily do what their parents suggest, when the parents make participation enjoyable, through encouragement and positive reinforcement. In this way, children learn the reactions which lead far away from negative effects on others, because they never see the violent behaviors.**

Big Holes – 2018 08 April

*How can we avoid exposure to the negative?*

**Tell children that they might see examples in movies, television, video, pictures and photographs of harm being done. Tell them the people doing it are mistaken, and should not have done it. Tell the children they are in a great position to forgive and send goodwill to the perpetrators and victims of the bad and violent thing they have seen.....**

**They will quickly see violence and anger as poor choices, by their own preference, and this sending of the energy will diminish greatly any urge to act in similar fashion.**

Big Holes – 2018 08 April

*How do we manage wealth, poverty and want*

**Focus on the wealthy and wish them more and with beneficent love. Focus your thoughts also on the poor and needy and think of wealth and riches for them, such that their wants and needs are removed. Do this for everyone whose finances come to be known by you. Leave yourself out of the process, out of your thoughts. You will be included by someone else, and likely many other people. This will take care of you.**

Big Holes – 2018 08 April

*Focus on Donald Trump's bank accounts and wealth then wish him more?*

**Yes! Wish more wealth on anyone, not just whomever you believe needs it more than someone else. You are not in a position to determine what others might need any more than they can decide, against your preferences and will, what they believe you need. Suggestions can be made,**

**always, but control should never be a part of the process.**

**The rising tide lifts all boats, as you humans have often said. Focus on the ocean of wealth which supports all of you, and wish high water and smooth sailing for any and everyone on the seas of income, the oceans of earnings.**

Big Holes – 2018 08 April

**Fear disguised as control. The core group of controllers of each faction or region of the world and human societies - there are three - believe truly that mankind would descend into chaos if central control and leadership did not exist.**

Disinformation – 2018 09 April

**By making certain the internet is widely used and accessible to everyone, it becomes far easier to identify hot spots. Surgical applications of correction are equally if not more effective and also virtually unknown, when compared to across the board restrictions of access.**

Disinformation – 2018 09 April

***How are the 3 regions of the world divided? Which countries/continents are included in each?***

**TC: 1. Group 1 of 3: Great Britain, the USA and British Commonwealth nations, 2/3 China and 3/3 Russia.**

Disinformation – 2018 09 April Comments Jennifer/Patrick

**TC: Russia did nothing to help the president of the USA get elected, or put the losing candidate into second place. What Russia did was make attempts to gain advantage, insight, entry, favor and influence with both candidates for president of the USA. The ongoing investigation will eventually lead to this summary and conclusion.**

Disinformation 2 – 2018 10 April Comments Patrick

***So what's time?***

**An astrological effect upon the surface of a sphere in orbit around a star.**

Time Means What – 2018 23 April

***The moon, which doesn't rotate at all and by the way, why is that?***

**It was placed into Earth's orbit intentionally and is aligned so that its orbit varies inside a minimal variation or very minor ellipse. A rotating orbit would not achieve this.**

Time Means What – 2018 23 April

**The absence of the moon, across the nearly totality of your planet's formation and existence, allowed several things to occur. The shift in Earth's orbit shapes permitted Earth to be farther and closer to your central star, causing climate variation which was risky to mankind. What you call ice ages.**

Time Means What – 2018 23 April

***So how is it an illusion?***

**C: It is real, inside a human body and living on Earth. If you believe human existence is only what happens between conception, birth and death, then time is solid and concrete. If the human mind and soul are taken together as pre- and post-existing the body, then time is the illusion of Earth life and bodies. Very real when captive to them, an illusion when reality returns.**

Time Means What – 2018 23 April

***Human life is not reality?***

**No. It is an illusion created, for temporary existence as departure, escape, self-assignment or journey away from then return to, reality.**

Time Means What – 2018 23 April

*What then is the human benefit of understanding there is no time?*

**To welcome each day as a gift, not a burden. Each day aboard Earth is a ride on your favorite roller coaster, with breaks to catch your breath and recover. The idea for breaks is not to become accustomed to the thrills of the ride, so that each day becomes an adventure.**

Time Means What – 2018 23 April

*We can die tomorrow and choose to be re-incarnated in sixteenth century Cambodia?*

**Yes, that is common.**

*Cambodia?*

**No, simultaneous incarnations out of sequence with Earth time.**

Time Means What – 2018 23 April

**All chapters of a book are in the book, simultaneously, as are each paragraph, sentence, word and letter. You may choose to examine each of these in the order you choose. We would say, each day on Earth is approximately equivalent to a word in a short to medium length book or novella, as would be said. Twenty five thousand days is now a normal life, and this is also a short book.**

Time Means What – 2018 23 April

**A book written could have been written much differently, or not at all. This means the remaining parts of a book to be written already have been, and there are many versions. Your future is choice.**

Time Means What – 2018 23 April

**Humans have decided to call the next daylight cycle Tuesday the 24th. A name does not change the thing to which it is given.**

Time Means What – 2018 23 April

**You can always choose what value to assign to each gain or loss. Because at the end of your life's book, you discover that it was only a book, the knowledge of which you will have always, and that you will live forever, as you always have.**

*Esteemed Committee, thank you for the time.*

**We finished just in time, didn't we? Be well, one and all.**

Time Means What – 2018 23 April

**"Past lives" is a timeline derived label we create from our illusive beliefs, which we then attach to things. This helps support the perspective of a timeline, which only exists on Earth because of changing sunlight angles.**

Time Means What – 2018 23 April Comments Patrick

**When I first saw your unintentional typo in the word "Beginn8ng", I thought how cool.**

**An right side up "infinity symbol" made it into a conversation about time. I suppose "infinity" could be conceptually couched in both space and time conversations.**

**No distinct beginning or end points.**

**Proving "time & time again", how easily I can amuse myself.**

Time Means What – 2018 23 April Comments Tim

**The small minority of souls chooses a life incarnated. It is a unique, challenging and supremely rewarding experience, so much so that repeats are common. To receive a contact in your and our true home from a soul on an incarnated journey, is a wonderful gift.**

**Those incarnated souls who pass through what humans consider a traumatic experience, grow so immensely that a new version, twist or interpretation is likely pursued if the reversed experience will provide additional growth.**

Random Or Haphazard Channeling – 2018 28 April

**Love and value those around you. Do not criticize, condemn or threaten as a tool of education, but rather lead by example.....Lead by example. Not by command.**

Random Or Haphazard Channeling – 2018 28 April

*The age old dilemma of humanity; without a central authority issuing instructions, sometimes commands and even threats, mankind would descend into disorganization.*

**Not true, not even close. The fastest way to achieve peace and equilibrium in all things is to release them.**

Random Or Haphazard Channeling – 2018 28 April

*How do we create a bubble without rules of exclusion?*

**Eliminating rules and exclusions is what makes the bubble.**

*No penalty for murder?*

**No, none. This would stop the murderer as quickly as jail or execution, without need for incarceration. No revenge, no penalty, no sanction. When a killer saw that his actions only brought sorrow and forgiveness to and for him, he would change course immediately.**

*Is this why animals do not kill but for protection and defense, and do not seek revenge?*

**Yes! Humans need not kill to eat.**

Random Or Haphazard Channeling – 2018 28 April

*Could we feed ourselves without stock animals or hunting?*

**Of course, many times over.**

*All seven billion of ourselves?*

**Yes! Earth can easily manage ten billion humans but for behavioral, social distortions. This can be done with little additional effort and it would be seen as happy activity, not labor.**

Random Or Haphazard Channeling – 2018 28 April

**Gautama Buddha, Mohammed, Yeshua and Ghandi are four examples. Humans downplay such examples such that current members of the human population are never allowed to reach this level of example, because they represent a reduction in control. The ability to control resources and create the false image of scarcity are highly valued.**

Random Or Haphazard Channeling – 2018 28 April

*What does an alien ET doctor, or physician equivalent, do when not being a doctor?*

**Many things, there is no pattern. Physical labor, art, instruction in many areas, entertainment**

Random Or Haphazard Channeling – 2018 28 April

*Do social activities get in the way of work?*

**They are the same and no. This view of one or the other is human.**

*How about in the 4th dimension, where many ETs live?*

**Only among the more advanced who travel the stars, and the same view holds true. If one**

**individual undertakes a project but could use help, others volunteer as they can and prefer. The helped are also helpers, from time to time. Children grow watching this example in their parents, and come to act this way naturally.**

Random Or Haphazard Channeling – 2018 28 April

*Is a similar pattern (resources scarcity) awaiting us in the next few decades?*

**No, however it seems to be. Physical forces, events and effects will temporarily suspend this activity and thinking, although the opposite will seem to be the case. As geophysical events cause disruptions to human behavior, patterns and general activity, there will be a renewal of the old and currently existing habits to secure control of resources, however these efforts will surprise both the observers and those attempting domination and control, for they will not be successful.**

Scarce World Gubmint – 2018 02 May

**The rebuilding of a cohesive economic and political ordering assumes it exists now and moreover, that enough humans will want rebuilding.**

Scarce World Gubmint – 2018 02 May

**The divisions between sovereign nations will dissolve however this development will be as or even more traumatic to those who might now say they prefer such arrangements. There will be an almost complete absence of rules and regulations now assumed necessary, even common, for national borders to exist.**

Scarce World Gubmint – 2018 02 May

**You place value in reaction, and many humans pursue those reactions. Many more do not, but this quality is not deemed socially valuable or even desirable, thus de-emphasized or simply ignored.**

Scarce World Gubmint – 2018 02 May

**Regional differences will abate, as migrants will discover they must change a degree of their preferences and expectation for each degree of welcome they simultaneously desire.**

Scarce World Gubmint – 2018 02 May

**Often have we spoken of five dimensions, however we do this to expand on the three inside the one of three in total.**

**There are nine or twelve dimensions, 3 levels and 3 or 4 within each, and our previous reference to the fourth and fifth dimensions are the second and third.**

**The human occupied first dimension has three aspects, height, width and depth.**

**The second dimension allows movement and perception not possible in the first, with physical properties of the first and other properties and laws of physics the first does not offer, does not contain or does not generally allow.**

**The third dimension is the absence of physical properties the first two contain, offer and require.**

**There are three measurements within each, and four sides: top, bottom and two views, inside out and the opposite.**

**The second and third dimensions perceive and can interact in the lower or lower two, but the first and second cannot interact into the upper dimensions and perceive that in the first.**

**You on Earth exist and are seen in the second and third dimensions just as you see everything else in the first dimension you occupy.**

Dimensions – 2018 03 May

**There are twelve or nine dimensions, both statements are correct. The difference is how you**

**choose to perceive it; top, bottom and two sides of transparency, or the triangles which make up the subatomic atomic and crystalline structures of all matter.**

Dimensions – 2018 03 May

**To Earth you have gone to forget many things, so that you will discover what and who you really are, through the environment of your Earth existence. To want to know about parallel universes and dimensions you do not and cannot perceive serves as a very entertaining, nearly useless distraction.**

Universal Parallel Dimensions – 2018 11 May

**Parallel courses of events exist, these are called, among other things, lifetimes or incarnations. The events of one seem to occur in series, along a numbered line and in sequence. The events of another incarnation do not seem to touch. They are parallel in direction, but not parallel by the classic definition, because parts and bits occasionally touch.....**

**You exist in all nine universes, however your soul does not occupy all of them simultaneously. It goes from one to another, and can do so even as the soul is incarnated into a life in the physical three dimension you know and occupy.**

**How can you be incarnated yet also be aware of the higher dimensions and exist in other universes. To understand this is to have the experience. Die and you shall understand again..... When your body dies, you will return to the fifth dimension and all nine universes will be yours again.**

Universal Parallel Dimensions – 2018 11 May

**Dimensions are levels of existence and perception, of physical movement and properties of the surroundings. There are three, a dozen in total, plus a trio of bonus levels, being fifteen.**

**Humans occupy the width, depth and height of the first group.....**

**Each of the five levels allows the three parts within to be perceived together,**

**Each level is blocked from perceiving the next level but the subsequent levels can always see itself and the previous ones.....**

**Parallel courses of events are not dimensions, they occur vertically within them. Each separate, alternate or parallel course of events can be seen horizontally from inside the dimension group where it occurs, 1 through 5**

Universal Parallel Dimensions – 2018 11 May

***Do these 9 universes have the same physical laws?***

**Yes, physical laws and properties of matter and energy are aligned to dimension, not universe.**

***Do these universes have drastically different event lines?.....***

**.....events in one are not the same as another. There is no similarity of events between them.....These alternate timelines or series of events already exist in the universe you occupy. The access to these alternate courses is available in other dimensions, not universes.**

***Do aliens have the technology to move from one universe to another?***

**No**

***So, if I manage to go to a different universe, there is no possibility of ever running into another version of "me"?***

**No. That other version of yourself exists already at your soul level.**

**The first dimension has three, the second dimension has three, and this is referred to as the fourth.**

**The third dimension has three also, called the fifth.**

**1+ 1 + 1 3 but it is the 1st**

**" 3 also, the fourth, really the 2nd**

**" 3 also, the fifth, really the 3rd**

**The nine universes represent a matrix of 3 on each side of a cube, with twenty seven in total. Any plane or slice through the cube reaches nine, thus the existence of nine universes.**

Universal Parallel Dimensions Comments Santanu – 2018 11 May

**Each human exists inside a self created area of perception.**

**.....You each create the ability to perceive - to see, feel, hear, touch and interact - with specific things in specific ways, or in general.**

Universal Parallel Dimensions Comments Patrick – 2018 11 May

**For a human, time travel is only achieved after death of the physical body, or in dreams.**

Time Travel – 2018 12 May

**Incarnation is time travel. It seems interesting because the human mind is acknowledging human life to be time travel.**

Time Travel – 2018 12 May

***Since all lives are simultaneous....***

**....adjustments to the current life can and are made by the soul, from another life you would deem past or future, along the Earth timelines.**

**This is the reason emotions and physical effects are felt in one life, caused in and coming from another life. Fear, anxiety, insomnia, tension, stress, euphoria, joy and glee are examples. Time travel, what all humans do.**

Time Travel – 2018 12 May

**Souls do not evolve, they grow and expand.....**

**Where everything exists simultaneously, there is no instant.....**

**Nothing is experienced "at once"; a concept which can only appear against the backdrop of a sequential time illusion.**

Time Travel – 2018 12 May Comments Patrick

**Imagine you walk into a pitch black room. You take out your flashlight and see one item after another as you point your flashlight at things and you do that they come into view. You are shining the light on one thing at a time but when the room is fully lit you will see all the things where always there at the same time.**

Time Travel – 2018 12 May Comments Linda

**Think of a video archive; think of YouTube. You have access to all of the files and can review each one, in any order you like. You can make a NEW video and insert it anywhere you want.**

**This is how you can create other realities, however on Earth you are tied to the number line called a calendar.**

Time Travel – 2018 12 May Comments Patrick

**The whole world will begin noticing by 2023 and things will be in full swing in a decade. The entire world will be affected in many ways, socially and economically as well as by geophysical events and phenomena.**

Another Shift Geophysical Event – 2018 17 May Comments Patrick

*Will there be a significant volcanic eruption in Yellowstone National Park, Wyoming USA?*

**The subsurface volcanic infrastructure, to use a human word somewhat accurate, does not feed such an event scenario.....There will be significant events however, and large amounts of volcanic ash will be produced.**

One Reader Q&A and Stuff – 2018 25 May

*Why are we humans so concerned with privacy?*

**Social training, expectation and reaction. All learned behaviors.**

One Reader Q&A and Stuff – 2018 25 May

*What sorts of choices will be given (by extraterrestrial cousins as event of the shift occur)?*

**How to restore infrastructure of many things, such as communication, housing and transportation. Most importantly, agriculture and food.**

One Reader Q&A and Stuff – 2018 25 May

*How about medical treatment?*

**Not so much, because a fair amount of medical conditions humans incur are self generated.**

One Reader Q&A and Stuff – 2018 25 May

**Humans need not employ violence to eat, not anymore. The technology to cultivate, for example seafood, which does not require violence or suffering in the animal, exists everywhere. You may now end the life of a cow by simply allowing it to go to sleep from lower than ambient oxygen. It will simply feel sleepy, as happens to all animals, including humans, who require oxygen. Agriculture is already easy in this way.**

One Reader Q&A and Stuff – 2018 25 May

*How do alien ET civilizations.... provide for an exchange of values in a way satisfying to producer and consumer?*

**Voluntary product banks are a way to begin this. Each producer can accurately estimate output over time, and list the actual product inventory also. Consumers can check and register for a share of the output. This idea is the root of the political system humans call communism, however the failure of the system on Earth has been the compulsory aspect.**

One Reader Q&A and Stuff – 2018 25 May

**Nation states are not a required social structure, and many an alien extraterrestrial will happily explain how there are civilizations which created them then moved away, and became very sophisticated.**

One Reader Q&A and Stuff – 2018 25 May

*The UFO Conference next year, will it be popular and beneficial to the people in attendance?*

**Yes, very much so. Plan for it, the popularity.**

One Reader Q&A and Stuff – 2018 25 May

**When attitudes and understanding about money change, so will violence reduce. I do not foresee voluntary changes to general human perceptions of wealth and money, until financial chaos and collapse force new attitudes and perspective readjustments upon nearly everyone.**

Mass Killers and Society – 2018 26 May Patrick

**TC: Events will occur as attitude changes both precede, and in other cases result from, the**

**changes to your physical world. Look always within yourself for answers, before looking elsewhere for confirmation or disagreement.**

Mass Killers and Society – 2018 26 May

**Many technologies, methods and procedures of scientific and technical application were developed by humans from clues extracted from the equipment found in the wreckage (Roswell, New Mexico).**

Neil Armstrong – 2018 28 May

**Every object emits a resonant specific frequency, not simply a common resonance the materials might also possess. The resonant frequency of a certain grade of iron is one ingredient, just as the size and shape of the object also figure into the identifier.**

Neil Armstrong – 2018 28 May

**As the alien ET vessel traverses vast distances, its course is continually adjusted by referring to the source of the destination object resonant frequency, as unique as a finger print or DNA sample.**

Neil Armstrong – 2018 28 May

**Time travel is a function of velocity, different from navigation as just explained. Time exists on Earth by virtue of light and starlight angle change on the planet's surface. Moving in excess of the perceived speed limit allows time to be reversed to a prior moment.**

Neil Armstrong – 2018 28 May

**The translocation or movement across great distance is a physical and mental function.**

Neil Armstrong More – 2018 03 June

**The way to reach a destination far away is to tune in to the frequency of the location, which requires the ability to detect the parameters.**

Neil Armstrong More – 2018 03 June

**Each location everywhere has a vibrational frequency, similar to the coordinates for a location upon Earth's surface. The location has physical parameters relative to everyplace else and reaching it simply requires the travelers to adjust the vibrations and coordinates of their own vessel to match. This will begin the journey. The propulsion is magnetic potential, which exists everywhere, and can be generated anywhere there are free electrons, what is called plasma.**

Neil Armstrong More – 2018 03 June

**You may and can create a physical bubble to surround yourself, and adjust this enclosure to the frequencies of something invisible or which does not seem to exist in the slower velocity dimension..... your human physicist Einstein once remarked that solid matter is simply frozen light. This is correct; and when you melt light, you exceed its limits also.**

Neil Armstrong More – 2018 03 June

***Melt light?***

**You melt iron and receive light? It glows, does it not? The light can be melted also, and as this occurs, it leaks into the higher dimensions.**

Neil Armstrong More – 2018 03 June

*We'll be shown the technology when we can handle it?*

**When your ability to understand other civilizations is developed to the point where you collectively will not interfere or distort what you find.....This begins with no harming yourselves. Mankind has not reached this level.**

Neil Armstrong More – 2018 03 June

*What moves an interstellar ship between two stars, thousands of light years apart?*

**Electromagnetic dissonance or differential. Everything attracts and repels, as do all magnetic fields. The movement simply requires creating enough reverse force. The amount of magnetic potential in the universe is unlimited, and inside a galaxy is enormous.**

Neil Armstrong More – 2018 03 June

**The travelling vessel does not gain speed without a destination, parameters of which both steer and guide the generation of the magnetic forces. The amount of electromagnetic material across any galaxy is vast.**

Neil Armstrong More – 2018 03 June

**You cannot make a capsule which could allow the astronauts to survive the segment of the voyage through them (Van Allen Belt)**

Neil Armstrong More – 2018 03 June

*Do they wear suits for protection?*

**No, their ships provide more than adequate protection.**

*With more of the foil?*

**That is used as a safety, passive back up; the principal method of protection is creation of a magnetic field which repels the radiation. The ship can do it easily, and this is one purpose of the generator devices.**

Neil Armstrong More – 2018 03 June

**Gravity is the result of movement inside atoms, electricity is movement between them.**

**Yes there are edges or boundaries. Borders is a better human word to describe the physical limits between universes. Black holes are doorways to, from and between universes.**

Neil Armstrong More – 2018 03 June

*Why is a benevolent reason required (to use a time travel device)?*

**You will distort one another's lives, including your own, if you disturb previous events.**

The Meaning Of Time – 2018 07 June

**All things are always in motion; a physical object which appears stationary is only still because the surrounding objects appear motionless also. Earth is constantly travelling through space, as do all things.**

The Meaning Of Time – 2018 07 June

**Earth: 4:12: 256: 85732589: 28345987321**

**Earth frequency:**

**Quadrant 4**

**Layer 12**

**Sector 256**

**Location 85732589**

**Object 28345987321**

**"What will be revealed with this system is that the resonant atomic frequency of each location will match the multiplicative total of the location. Planet Earth contains atomic elements; each atom of each element will have a frequency, an expression of its formula which considers pulsations or temperature also. The amount of each element is also significant and the grand total of these is a huge, vast and for humans nearly incomprehensibly large number, however when reduced numerically, will match the single digit if (of) the location frequency.**

The Meaning Of Time – 2018 07 June Comments Patrick

**There are 9 universes. They are the same size, all of them. There are many differences between them, but the complexity and vastness of each compared to one point of view, from one civilization in one solar or star system in one galaxy, is not relevant to that place or point in the one universe. Black holes are the doorways between the nine universes, which are not crossed, unless everything from the previous universe should and is understood will be changed thus lost.**

**There are nine because that is the basis of matter; three sides of a triangle, three of them make nine, and repeat. Three squared, in mathematical terms.**

**This is why there are nine single digits; the meaning of one dozen is simply the visualization of a triangle's three corners moving through four stop points as a triangle rotates, creating mass, density or solidity**

The Meaning Of Time – 2018 07 June Comments Patrick

***Exactly who sent the technologies***

**Alien extraterrestrials sent them, and make no mistake, YOU ALL WHO READ THESE WORDS are alien extraterrestrials very much in the sense of the word's meaning, and you all are the alien extraterrestrials who sent these devices to yourselves.**

The Meaning Of Time – 2018 07 June Comments Patrick

**Wow, the thought that we readers are sending information from the "future" to our "present day" selves never crossed my mind! Of course! That prevents non-interference because we are talking to ourselves.**

The Meaning Of Time – 2018 07 June Comments Sue M

***How do humans avoid homicides?***

**A key component is acknowledgement of two things not well recognized, if at all, among humans; one, that it is not possible to kill and two, the act harms the killer far more than his target.**

Stop Human Violence – 2018 20 June

**Behavior which produces a reaction is repeated. Behavior ignored fades quickly and disappears. It does not matter if the reaction is positive or negative for its repetition to be reinforced; either will do it. Ignoring behavior is what causes it to disappear.**

Stop Human Violence – 2018 20 June

***Human criminologists say murder happens because of power, lust, jealousy, anger and money.....***

**Z (Zebulon): Jealousy is a part of power, which is better called control. Lust is also the same. Control, anger and wealth. The last is also a part of control, so it can be accurately stated that control and anger are the causes.**

***How do we remove anger?***

**Z: Make yourselves belong to one another..... Added to the process is example; violence causes suffering and distress and the perpetrator has learned to see this as revenge and therefore good.**

**Revenge is taught**

Stop Human Violence – 2018 20 June

**Z: the violence humans perpetrate results from absence of .....the study of good ingredients.....  
Humans study the perpetrator.**

*How do we teach the positive?*

**Z: Stop tuning in to the negative.**

*Voluntarily?*

**Z: Of course, this is the only way. The moment anything is attempted suppressed puts emphasis on it, which brings it about and causes it to happen more.**

Stop Human Violence – 2018 20 June

*How do we eliminate violence used for food?*

**Z: Trap animals then suffocate them with lowered oxygen. They will simply fall asleep**

Stop Human Violence – 2018 20 June

**The Committee explains why the geodes became cold in your hands.....You sent energy and held the geodes in order to do so. Your thoughts used them as poles or transmitters, because that was your intent and belief, and the energy was drawn from you and sent to Raylene. This sent the energy through the geodes, lowering their temperature.....**

**Yes, you can look at an object and raise its temperature, if you believe you can. Doubts leave circuits disconnected; belief is the switch. To have the former is to close the latter.**

Stop Human Violence – 2018 20 June Comments Patrick

**In this realm, of energetic beings without physical bodies, knowledge is not obtained, not stored or withheld. It is available to all souls aware and interested in the information.**

Reader Q & A – 2018 30 June

**We are not evolved. We are. Simply. We originated along with you and all souls, at the center of existence, to which we still belong. We are not tethered to a planet, and neither are you. Your body is a temporary thing on one of billions of planets, no more. There is but one stage to spiritual growth, it is called expansion. It occurs continuously, to all souls.....There is no time for us - it does not exist away from Earth - and it is only a temporary condition of Earth surface existence, and remains an illusion overall.**

Reader Q & A – 2018 30 June

**Nearly all humans have lived as a physical being on another planet, as what you consider an extraterrestrial alien.**

Reader Q & A – 2018 30 June

**Alien ET visitors to Earth are throughout the solar system or group of planets orbiting your sun.**

Reader Q & A – 2018 30 June

**The biggest step is believe you have the ability to communicate telepathically. Then, begin doing it. You already transmit, unaware are you of this. Simply be aware that when you think, you transmit. Then, begin listening to your thoughts. You have them, so listen to them also. Some are yours, generated by you and some are incoming. Listen closely with your mind. The differences will emerge.**

Reader Q & A – 2018 30 June

**Alien extraterrestrials visiting Earth are most benevolent. Malevolents are not permitted. There is zero risk of alien trouble for humans, who themselves are alien extraterrestrials, aboard Earth for one hundred thousand laps around the central star, so far.**

Reader Q & A – 2018 30 June

**Surely if one was close to , and on a first name basis with ArchAngel Michael, theyde just say G day, nice day Mick ! ! ☐☐ He just told me to say that, and i therefore offer nil apologies, gotta luv his sense of humour !**
