

HCPs Part 2 of 3

14 January 2021

Q: How many humans are part of the HCP group?

C: This depends on where membership would be defined. Several hundred or thousand, varied according to access, knowledge and authority.

Q: The core group in the size of hundreds knows and controls how much more than the larger sphere of thousands?

C: It is not a matter of knowing, but rather a matter of compartments, knowing how many truly exist and what is inside each one. This knowledge is what supplies control.

Q: How does the control operate?

C: With lures, not shoves. The controllers use money to attract, motivate and manipulate. The human desire for ever larger quantities of money, makes this easy.

Q: How do they get all this money?

C: They print it.

Q: The HCPs can do that?

C: Of course, and they have been as much the motivation behind changes to financial systems as beneficiaries of the changes.

Q: Elimination of the gold standard?

C: Yes, this was one of many steps engineered by HCPs.

Q: Y'all said earlier that the HCPs pursue power and control, not money. Why?

C: Money means very little and almost nothing if it cannot be given to somebody. If nobody will accept it, if nobody will act when offered money, the money means nothing. Besides more complicated manufacturing of paper, ink and printing, does much difference exist between a board game cash and money printed by a monetary agency?

The technique involves making the process appear controlled, precise and operated for the benefit of the citizenry. The opening for the HCPs is, as long as the process appears to work favorably, other things it does can be concealed.

Q: How is this done? The concealment?

C: We take as an example the central bank of the USA. Its creation was opposed; core members of the opposition were eliminated by sinking a British cruise ship. This removed the behind-the-scenes resistance of very wealthy, influential and would-be owners of the regional banks which in turn own the central bank.

The others in favor were no longer influenced or managed by the recently deceased key opposers, and were easily recruited.

Q: Was the crash of the US economy in the 1930s related?

C: It was intentionally caused. The bubble of investment values leading to the sudden collapse of the USA's main stock and share exchange in 1929 was a result. The subsequent

mistakes of restricting the money supply, which were intentional and not a mistake, inflated the value of currency secretly held.

Q: Why was this done?

C: Shortly after the USA's central bank was created, a massive world war erupted, as your history details well. Once the influenza epidemic receded, after causing the end of hostilities, the central bank's controllers, the HCPs of that time a century ago, set their sights on regaining lost ground. Their strategy involved severe sanctions and war payment reparations from Germany, holding this nation back and allowing other European nations and the USA to be artificially inflated in value. *The Roaring 20s* this era has been nicknamed.

Q: World War II was planned by them?

C: No, but it presented another opportunity. Massive disruptions to economies are not as beneficial to currency and wealth manipulators, but represent an opportunity, because war must be financed just the same as any human endeavor.

Q: How much money do the HCPs have and/or control?

C: Many hundreds of billions of USA dollars and equivalent amounts the world over.

Q: How do they conceal this?

C: They own the banks where the money is held, and these banks own the federal reserve of the USA and also other countries. The banks simply present an accurate picture, financial statements you call them, of what they have and done, absent the hidden funds.

Q: I often remember the former US Representative from Texas, Dr. Ron Paul, who when he ran for president a few moons ago, often said on the debate stage that the US central bank should be audited. His candidacy went almost no place but he seemed to be on to something.

C: He was however, as you all know well, political support is not easily or well generated by suggesting who is bad and should be investigated. This holds value only when it can be attached to an adversary, the attacker is or offers a happy alternative choice.

Your political operations revolve around promising goods, services and agreements for happiness. The candidate who most successfully promises, prevails; if this candidate delivers, s/he becomes very difficult to openly defeat.

Q: If the HCPs have so much money and the ability to create it at will, what motivates them?

C: They lust for power and control much the same way a cigarette smoker needs another. Some require higher quantity and more often, some less. Once accustomed to and often, addicted to the substances —nicotine or dopamine— it is difficult to stop.

Q: Cigarette smokers often know they should not, so what about HCPs?

C: Few of them believe what they do is bad for them.

Q: How can they be this way? Are they born with a life plan to be such a person?

C: Yes, in about half the cases but allow us to say, part of the life plan is to create the opportunity for outsiders, nearly the totality of whom would bitterly oppose and punish the activity. These outsiders have the chance to reveal then stop what occurs.

Q: The allegations of child sacrifice, the practice of Luciferianism or Satan Worship, is stomach turning.

C: This doesn't exist but as an idea or ideal. No evil fallen angel exists who would corrupt, twist and harm humanity. This notion is another creation of a perceived enemy. The Nazi regime and Jews are an obvious example. The HCPs have fallen badly for this false notion that a bad angel will protect and reward them for sacrifices made to and for that devil. This is a complete yet extremely useful illusion.

Q: How does it serve them?

C: Recruits are brought up the ladder, offered ever more enticing rewards in order to see who will resist physical self harm, to continue on to greater enjoyment of pleasures and benefits. As we have already explained, these recruits are compromised only after they have been contaminated to the point they cannot threaten the core group. Ever more interesting pleasures are provided, until a point comes where the horrible acts and atrocities are committed. Once they discover their compromise, it is too late to escape.

Q: Like an organized crime gang, such as a mafia.

C: Little structural difference exists.

Q: How do they control politics?

C: They wait until an elected official takes office, then offer incentives to influence the votes. The politicians are never recruited for higher membership, they are the tools and parts of the machine.

Q: All the way to a head of state?

C: Especially. The method here is to offer both a sweet reward for obedience and punishment worse than death, for resistance. In recent decades this has become less effective or necessary, because the greater sphere of government has been that much more selectively influenced.

Q: Do the corrupted politicians know about the really nasty stuff?

C: No. This is kept away from anyone who does not participate.

Q: What happens to "guest" who has been targeted for inclusion, when s/he fails to follow through? Doesn't continue to play along with the process?

C: S/he is eliminated, most often it is a male person.

Q: Why mostly male?

C: Females are not motivated over time, in a sustained way, by controlling others to the point of harm. This is revealed in crime patterns, where females are rarely involved in severe violence. Some can be, and the ranks of the HCPs reflect a proportion similar to society in general.

Q: Why can't this be revealed all at once?

C: Nobody who would undertake such steps, holds enough information to make such a revelation. The small, small pieces of the greater enterprise—which would also seem quite large when examined individually, even though they are not—are always designed so that anything revealed can be explained away. Also, the responsible leakers and divulgers can be discredited quite effectively.

Q: How often are targets killed?

C: Only when necessary. The problem with doing this is how to conceal the murder yet make it serve as a deterrent. If successfully made to appear as suicide or random crime, few other risky workers will be dissuaded, unless unmistakable evidence is shown to these targets, and only to them. As often occurs with politicians, for example.

Q: What can any one of us mere little folks do with this information?

C: Abandon the idea you can individually change anything, so do not be concerned for yourself. If you were a direct target for use, function, work or anything more involved, you would know this already.

Be aware that what you are allowed to see, is what you are allowed to see. To change public sentiment thus reaction, to cause attention to be directed away from where it would better and likely otherwise be pointed, public information is carefully massaged to make certain it will appear a certain way.

In general, where national policy and international dealings are involved, be skeptical of what you are told, of what is seen in the press. Much of what has been traditionally reported was done accurately, and some still is, according to well established standards of good journalism. In these cases, the journalists are and were shown what was known they would display.

In recent years, imagery and speed of communication, not to mention volume of material, have exploded. This has led the HCPs into a relatively complacent position; power and influence are taken more for granted, as if a given, than was the case for the better part of the most recent century on Earth.

Look upon all situations and circumstances with benevolence. Never anger, hate or disgust. You might dislike intensely what you see or hear, which is okay, but never transfer this to a person. S/he is a soul, much as you are. This soul loves you just as you do also, and is connected to you. Remember this always, when another human says or does what you dislike.

Q: Esteemed Committee, thank you.

C: Welcome you and your friends all are. Our blessings, good wishes and most of all our deep admiration. What a job you are all doing.
