

# Shifting Weather

16 July 2023

I haven't paid close enough attention to know what's happening on most continents, but what has crossed my screens at the moment (*the middle of July, year two thousand twenty-three*) offers many reports of severe weather events:

- Today the surface temperature in Death Valley, California is supposed to approach all-time records (52-53°C, 127-129°F)
- Fires in Canada have been producing enough smoke to cause people to stay indoors across the eastern half of North America. This started a few weeks ago and is happening again now.
- Italy could suffer record high temperatures, 41-42°C (105-108) in Rome and the island of Sardinia suffering under 46-47°C
- The northeastern USA has suffered catastrophic flooding from intense thunderstorm rainfall in normally calm weather areas such as Vermont, caused by what the meteorology folks have labeled an "atmospheric river". Essentially a Monsoon rain type event, currently happening in northern India also.
- The entire southwestern USA is under heat warnings and advisories, applicable to one third of the US population.

Typical human caused global warming, right? *"Move along, nothing to see here..."* might say authorities...*"just weather anomalies"*, right? *"No evidence of a pattern....so, as you were told, move along now."*

Let's ask The Committee.

Q: *Isolated events which have always occurred or The Shift?*

C: The latter.

Q: *Cause(s) ?*

C: Solar wind and resulting magnetism.

Q: *What is affecting the sun?*

C: Universal energy.

Q: *When will the pattern become obvious?*

C: To whom? Many humans, we guess at this moment more than one third and nearly half, will never believe anything is coming but the end of the world, brought about as punishment from Higher Up as punishment for mankind's misdeeds, missteps and mistakes, as retribution for willful disobedience.

This view is attractive to the power, authority & control hungry humans. The identification of human causes sets the table for accusations of negligence or malevolence among groups of humans. Successfully hurling blame is more fun than mud and cow droppings dropped upon the transgressors of society, for the humans among you given to such a perspective.

Q: *Why do some people see the world this way?*

C: Inculcated arrogance.

Q: *When will the pattern become obvious to the human(s) willing to examine it?*  
C: It should already be, but this is not being widely or narrowly discussed, for many reasons paramount among them being unawareness.

Q: *Can anything trigger the unaware folk among us?*  
C: Yes, the Dim Period will cause a strong, in many cases radical shift in human reactions and understanding. We would prefer something other than a perceived negative event become the catalyst, but humans are inculcated, indoctrinated to the point of brainwashed to seek, focus upon and ogle all eyes upon disaster, destruction & distress.

Q: *I saw a recent video where the presenter, host or messenger delivered an explanation about the dangers and pitfalls facing “woke” or progressive activists in western nations. The essential message was, such people will lose in either case, whether their causes prevail or succumb. The true power merchants are currently taking advantage of the “useful idiots” who promote progressive causes and accompanying chaos, however the promoters of woke will be quickly discarded, either eliminated or sent away, once tyrants seize power and no longer want or need chaos, dissent or activism. Many Marxist tyrants have used this formula, now being applied in North America and Europe. To even suggest to the wokester jokesters how they’re being played for fools, elicits bitter retorts and recriminations.*

*As interesting as was the speech, I wonder how far things will go before the geophysical changes progress to the point progressive wokeness is quickly forgotten. Any forecast, Esteemed Committee?*

C: Asking us to forecast the occurrence of geophysical events you are? An answer we can either not provide because we are not permitted, or the answer is unknown.

We shall say, current social trends will turn sharply away from their current heading when fuel prices again skyrocket sharply, and the turn will be not temporary but more permanent as geophysical events and effects accumulate.

Q: *At what point will the global warming alarmists stop pulling the emergency levers?*  
C: Many will not stop ever, they have become accustomed and even addicted to the thrill of setting off panic. As there shall always be a segment of the population willing to listen, the process will continue for quite some time, throughout The Shift.

Q: *Did the Titanic submarine victims know what was happening?*  
C: For several seconds, yes. Two of the occupants knew something bad would happen.

Q: *Did they die quickly?*  
C: Their souls were out of their bodies before the submarine imploded. The vessel and everything inside was crushed in just a few hundredths of a second.

Q: *In a blink of an eye?*  
C: Yes. No pain was anticipated or felt.

Q: *Was it their life plan to die that way, for all the occupants?*  
C: Yes.

Q: Thank you, Esteemed Committee.  
C: Welcome you all are, as always. Do return soon, readers and host both.
