

# State of the World

02 June 2023

As mentioned in a comment to a recent post, during November 2022 (*yup, about six months ago*) Earth's human population surpassed eight billion. An American musician from Louisiana named Jerry Lee Lewis had a big hit song 🎵 which predicted this accurately a few years before 3 billion, *A Whole Lotta Shakin' Goin' On*.

I hadn't looked at population growth rates in years; I was surprised again:

<u>Year</u>	<u>Earth's Human Population</u>	<u>Years Needed</u>
1804	1 billion	100,000
1927	2 "	123
1960	3 "	33
1974	4 "	14
1987	5 "	13
1999	6 "	12
2011	7 "	12
2022	8 "	11

Because the interval for a human population increase has shrunk from 14 to 11 years for a billion more people, let's assume growth levels off at a billion per decade, suggesting nine billion in 2032, 10 for 2042, 11 come year 2052, a dozen billion in 2062.... Can Earth sustain a human population of 13 billion just fifty years from now? More importantly, what about already shrinking populations in Europe and North America?

*Q: Esteemed Committee, before we explore growth and The Shift, has the population explosion been what fuels the HCPs? (Hidden Controlling Powers)*

*C: Yes, of course. More than fuels, attracts and draws them.*

*Q: The HCPs can't control population growth?*

*C: Can neither control nor influence to a material degree. What happens now with growth across human populations of Earth is decided by incoming incarnated souls and the collective hierarchy of all current humans, their guardian angel guides and prospects.*

*Q: Can an approximate date be provided for the leveling off?*

*C: Yes, but we shall not supply it.*

*Q: Why?*

*C: It is approximate, both human choice and incoming souls have yet to decide this. The decisions await which geophysical events shall be experienced as a human.*

*Q: Given the shrinking populations of Europe, the USA and Canada (but for immigration and newcomer children) is this the beginning of overall population declines?*

*C: Yes; we do not see national borders the way so many humans are trained to examine them. We observe mankind and humanity. We see analysis of multiple victim crime events in the USA which ignores similar or the same things in Mexico, suggesting some human lives are less worthy or others are more valuable.*

Likewise, upcoming declines in population have begun in some places before effects reach everywhere; this is occurring primarily in the places you have just named.

Q: *Earth won't reach a ten, twelve or fifteen billion human population?*

C: Earth will not reach nine.

Q: *Falling, even plummeting marriage & birth rates in the USA and Canada, along with rapidly rising average marriage & motherhood ages, are causes or symptoms? Is the population decline, but for highly encouraged immigration (at least in the USA) purely social?*

C: The decline appears to be social, but more is occurring. Sociological analysis within current human knowledge would not uncover the causes.

Q: *Which are?*

C: Several; women avoiding motherhood. This appears social and manifests that way by design and intent. Life plans and contracts, however, reveal the many currently and recently fertile females have chosen to avoid rearing children to avoid the distractions motherhood would create.

Q: *Explain that, please.*

C: Mothers naturally protect their children; women who choose to avoid this do not want the distraction of observing their own children as they experience changes themselves.

Q: *Please tell us about another cause.*

C: Men uninterested in marriage or fatherhood.

Q: *Isn't the popular notion the one that women are the uninterested half, that men are avoiding marriage because women are?*

C: This might superficially appear to be, but with men as with women, the underlying, invisible life contract is what drives this situation in nearly all cases. For men, unlike women, distraction from offspring is easier. Socially men have been able to detach, create distance and mentally disengage from children, to pursue support, protection and defense of family and its interests.

This inherent male trait serves the unseen pre-incarnation decision of most currently, recently incarnated souls to forego becoming parents.

Q: *Why are so many immigrants, including a material portion illegal, entering the USA recently?*

C: The HCPs require drone workers to perform as the foundation of economic activity, to sustain power. The HCPs prod and poke their employees, who are the people perceived to oversee policy and procedure, to do so. This was one significant reason Donald Trump had to be removed from office.

Q: *Are the events of The Shift going to make most of the social changes which result from population declines, moot?*

C: Yes and no; where population increases are still occurring, most of human societies, energetic changes will come to affect fertility even in people who attempt to conceive.

Q: *Thank you, Esteemed Committee.*

C: Do return.
